

- (4) Explain what you would observe if power were applied to a PIC loaded with the following code if an LED is connected to RB0 as shown in Figure 9.1. Note - *Goto* is being used, not *Gosub*.

```
before: High PORTB.0
        Pause 500
        Low PORTB.0
        Goto during
        Pause 100
        High PORTB.0
        Goto after
during: Low PORTB.0
        Pause 300
        High PORTB.0
        Pause 400
after:  Pause 200
        Low PORTB.0
        End
```
